INTRODUCTORY STATEMENT

Wallawa Traffic Group is proudly 100% Indigenous-owned, female led company dedicated to delivering high-quality traffic management solutions while giving back to the communities we serve. As a Supply Nation-registered business, Wallawa is deeply committed to creating local employment opportunities, fostering community partnerships, and promoting cultural inclusion in everything we do. Founded on the core values of safety, innovation, and operational excellence, Wallawa has rapidly emerged as a trusted provider of comprehensive traffic management services across regional and metropolitan New South Wales. Our skilled team includes industry experts in traffic control, planning, safety, administration, and human resources — all working together to deliver tailored, efficient, and compliant solutions.

With a growing footprint across NSW, our head office and depot is in Wollongong, supported by regional depots in Bega and Batemans Bay. We proudly employ over 90 staff across the Illawarra, South Coast, Southern Highlands, Queanbeyan, and Bega regions. Wallawa's Integrated Management System reflects our structured approach to leadership, compliance, and quality assurance. Our senior consultants bring over 15 years of experience — from managing minor detours to coordinating major highway closures. Our in-house planning team ensures all Traffic Guidance Schemes (TGS), Traffic Management Plans (TMP), Vehicle Movement Plans (VMP), and Pedestrian Movement Plans (PMP) meet the strict requirements of local councils and RMS. Wallawa Traffic Group has the capacity, capability, and cultural integrity to deliver traffic management solutions at scale — working confidently alongside local councils, major infrastructure contractors, and multinational corporations.

PRODUCTS & SERVICES

Wallawa Traffic Group provides end-to-end traffic management solutions tailored to the unique requirements of local councils, Tier 1 contractors, government agencies, and private sector clients. We are fully equipped and resourced to manage all aspects of traffic control, planning, and safety compliance across a wide range of project scopes.

OUR SERVICES INCLUDE

TRAFFIC CONTROL SERVICES

Provision of trained and accredited traffic controllers for road construction, civil works, events, and emergency response. We ensure safe and compliant traffic flow for workers, pedestrians, and motorists..

TRAFFIC MANAGEMENT PLANNING

Development and submission of comprehensive plans including Traffic Guidance Schemes (TGS), Traffic Management Plans (TMP), Vehicle Movement Plans (VMP), and Pedestrian Management Plans (PMP) to meet council, RMS, and client requirements.

PERMITS & APPROVALS

Liaison with local councils, Transport for NSW, and other authorities to secure necessary permits and traffic approvals.

EQUIPMENT HIRE

Supply and installation of certified traffic control equipment including signage, cones, barriers, arrow boards, variable message signs (VMS), and lighting towers.

24/7 EMERGENCY RESPONSE

Rapid mobilisation of traffic control teams and equipment for emergency and after-hours work.

PROJECT & SITE MANAGEMENT SUPPORT

Deployment of experienced supervisors and planners to manage operations on-site and ensure adherence to safety protocols and schedules.

Wallawa is also committed to local employment, Indigenous participation, and community engagement, offering a culturally safe, inclusive service underpinned by:

- ISO 9001 (Quality)
- ISO 45001 (OHS)
- and ISO 14001 (Environment) Certifications.

PLANT AND EQUIPMENT

- 20 utility vans
- 3 medium rigid trucks
- 4 trailer mounted traffic lights
- 2 Estop access utility vans
- 4 variable message signs

KEY PERSONNEL

Bec Woods – Director Bec Woods brings over 5 years leadership experience in traffic management, with a proven track record spanning minor road diversions to complex full-scale highway closures. Her deep industry knowledge and hands-on expertise ensure every project is delivered with precision, safety, and compliance.

Our team is supported by qualified professionals and a trusted network of subcontractors, enabling us to scale as needed to meet project demands. Work Capacity & Capability Wallawa Traffic Group has the infrastructure, workforce, and regional reach to successfully manage a wide range of traffic management projects across New South Wales.

With a head office and main depot located in Wollongong, and additional depots in Bega and Batemans Bay, Wallawa is strategically positioned to service key areas including the Southern Highlands, South Coast, Queanbeyan, Illawarra, Batemans Bay, and Bega. Our team of over 90 experienced professionals enables us to deliver timely, reliable, and scalable traffic management solutions. This strong operational footprint allows Wallawa to respond quickly to project demands, mobilise resources efficiently, and maintain consistent service delivery across both urban and regional settings.

TECHNOLOGY & SYSTEMS

Wallawa Traffic Group is proud to be certified to international standards across three key ISO systems:

- ISO 9001 (Quality Management Systems)
- ISO 45001 (Occupational Health & Safety)
- ISO 14001 (Environmental Management Systems)

These certifications, independently verified by SAI Global, reflect Wallawa's commitment to delivering services that are safe, high-quality, and environmentally responsible. Our integrated management system ensures that every aspect of our operations — from traffic planning and control to client engagement and field execution — meets the highest industry benchmarks for performance, compliance, and continuous improvement.

Industry Memberships, Registrations & Insurances.

PUBLIC LIABILITY INSURANCE: \$20 MILLION

PAST PROJECTS

JAMBEROO MOUNTAIN ROAD – KIAMA COUNCIL

Wallawa Traffic Group was engaged by Kiama Council to deliver full traffic management services for critical maintenance and upgrade works along the steep and narrow Jamberoo Mountain Road. This 6-month project required precise planning, risk assessment, and coordination due to the road's high gradient, limited access points, and regular tourist traffic. Our team implemented advanced traffic control measures, developed Traffic Management Plans (TMPs) and Vehicle Movement Plans (VMPs), and maintained safe and efficient access for road users, residents, and construction crews throughout the duration of the works.

MOUNT KEIRA ROAD – WOLLONGONG CITY COUNCIL

For this project, Wallawa partnered with Wollongong City Council to manage traffic for road resurfacing and infrastructure upgrades on the winding and heavily trafficked Mount Keira Road. This location presented challenges due to its proximity to schools, walking tracks, and residential zones. Wallawa provided full traffic planning, permit acquisition, onsite traffic control, and 24/7 monitoring. Our experienced personnel ensured minimal disruption to the community while maintaining a safe worksite for contractors and the public.

BEGA REGION PROJECTS – DOWNER & FULTON HOGAN

Wallawa Traffic Group was subcontracted by Downer and Fulton Hogan to support multiple civil and road maintenance projects across the Bega Valley region. Our team supplied end-to-end traffic management services including TMP development, council and RMS permit applications, and deployment of experienced traffic controllers and equipment. Operating in rural and regional environments, we adapted our strategies to variable terrain, weather conditions, and local traffic patterns. Our strong regional presence and knowledge of the South Coast enabled efficient mobilisation and quality delivery of services in alignment with Tier 1 contractor standards.
